Knowledgeable: jQuery, Webpack, Babel, WebAssembly, Chai, Mocha, Socket.io, Phaser.io

Some Experience: Python, Heroku, Jasmine, Enzyme, Sinon, Scss

Projects

Escape Hatch:

<https://github.com/escape-hatch/escapehatch>

- A npm library and web app for monitoring errors in projects, and providing access to solutions. Upon an error, a link is provided to our server, which presents aggregated and weighted results found from calling the GitHub and Stack Overflow APIs.
- I was responsible for the library module, and back end logic for calling, aggregating, and sorting all data from the APIs, as well as the documentation and home page.
- For this project we used Node, Express, Sequelize (Postgres), React, Redux, and Passport.

Lumber Jack's CTS:

<https://github.com/DillGromble/LumberJacksCTS>

- A top-down real-time online multiplayer game for 4 people. This was a Hackathon project which won the 'Nerd Cred' award for most technical problems solved in a short time due to the complications with managing state and latency across the players.
- I was the sole contributor for this project.
- Built with Phaser.io for a game engine and Socket.io for connection persistence.

Grace Shopper:

<https://github.com/DillGromble/grace-shopper>

- A mock e-commerce store specializing in seasonal decorations.
- I was responsible for much of the work that went into creating the shopping cart API.
- For this project we used Node, Express, Sequelize (Postgres), React, Redux, and Passport.

Experience

Sculpture Hospitality

Lead Auditor

Process Trainer

Operations Manager

Nashville, Tennessee

2014 - 2015

2015

2015 - 2017

- Responsible for ongoing development and implementation of client specific audit processes for 60+ bars/restaurants, and implementing training processes for all employees.
- Performed all new client audit setups, gathering information and calibrating software to meet client specific needs.

RGIS LLC.

Auditor

Inventory Control Manager

LaVergne, Tennessee

2010 - 2012

2012 - 2014

- Supervised inventory events overseeing anywhere from 6-50 employees while upholding positive customer relations.

Education

Fullstack Academy

2017 - Present

- A Y-Combinator start-up, 3-month immersive full stack software engineering course with an 8% acceptance rate. With its intense checkpoint driven curriculum, only 60% of my starting cohort graduated on schedule.

Tennessee Tech University

2005 - 2009

- Jazz Performance
